PROFESSIONAL SUMMARY

Engineering student at RGIPT (an Institution of National Importance, akin to the IITs) pursuing an Integrated M.Tech in AI, with hands-on internship experience building production systems at GeeksforGeeks. Proficient in Python, Java, JavaScript, and SQL/NoSQL databases, with a strong foundation in data structures, algorithms, and system design. Passionate about building scalable, reliable backend systems and eager to contribute to high-impact engineering challenges in the Web3 and digital finance space.

EDUCATION

Rajiv Gandhi Institute of Petroleum Technology (RGIPT) <i>Integrated M.Tech, Major in Artificial Intelligence (CGPA: 7.97)</i> – Institution of National Importance, akin to the Indian Institutes of Technology (IITs) – Qualified GATE 2026 – Computer Science (AIR 4047) and Data Science & AI (AIR 4134)	Bengaluru, Karnataka <i>Sep. 2022 – Apr. 2027</i>
--	--

WORK EXPERIENCE

GeeksforGeeks <i>Member of Technical Staff Intern</i> – Participated in the full software development lifecycle (SDLC) – designing, coding, testing, and debugging LLM-based automation workflows in an Agile engineering environment. – Designed and validated multi-step task trajectories for LLM systems, ensuring logical consistency and accurate execution, while maintaining clean and well-documented code. – Built structured, step-by-step executable pipelines for LLM-based task automation, collaborating with cross-functional teams to gather requirements and deliver reliable, production-quality features. – Participated in code reviews, followed coding best practices, and contributed to improving platform reliability and backend system performance.	Jun 2025 – Sep 2025 <i>Noida, India</i>
---	--

PROJECTS

Trade Analyzer Bot | *Python, LangGraph, LangChain, LLMs, REST APIs, Finance*

- Architected a scalable multi-agent AI trading system with 10+ specialized agents (Analysts, Bull/Bear Researchers, Trader, Risk Managers) orchestrated via LangGraph, integrating 6 real-time data sources for technical, fundamental, and sentiment analysis – directly aligned with digital finance system design.
- Engineered a structured reasoning and automated state management pipeline with a robust evaluation system combining LLM-as-Judge, ground-truth metrics, and factual-consistency checks, demonstrating strong problem-solving and attention to detail.

CRM System | *React, Node.js, Express.js, SQLite3, JWT, REST APIs, Tailwind CSS*

- Built a secure, full-stack CRM platform with multi-role access (Admin, Manager, Sales Rep, Developer) supporting customer management, analytics, and real-time updates; improved business efficiency by 50% through centralized data management.
- Implemented JWT-based authentication, role-based access control, and RESTful API endpoints – following clean code practices, layered architecture, and secure coding standards.

Style.AI | *Python, React, MongoDB, Express.js, PostgreSQL, Pinecone, Google Gemini API*

- Architected a full-stack web app for AI-powered fashion product discovery, integrating Pinecone vector search, Google Gemini for personalized recommendations, and MongoDB/JWT for user authentication and search history.
- Trained a recommendation agent on 10K+ fashion items, demonstrating significant improvements in search retrieval performance and system scalability – with Zod-validated schemas ensuring data integrity.

AI Voice Cloning System | *Python, PyTorch, Qwen 2.5 LLM, Hugging Face, Gradio*

- Built an end-to-end LLM-based voice cloning system using Qwen2.5 with zero-shot cloning and cross-lingual support, deploying a secure Gradio web UI with user authentication and automated model setup via Hugging Face Hub.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (ES6+), TypeScript, C, SQL
Backend Development: Node.js, Express.js, REST APIs, Spring Boot, JWT Authentication
Frontend Development: React, Next.js, Tailwind CSS, HTML5, CSS3
Databases: PostgreSQL, MongoDB, SQLite, MySQL (SQL and NoSQL), DBMS
AI / Machine Learning: PyTorch, TensorFlow, LangChain, LangGraph, LLMs, NLP, RAG
Tools and DevOps: Git, GitHub, Docker, Linux, Jupyter Notebook, VS Code
Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), System Design, SDLC, Agile, Debugging, Code Reviews, Clean Code Practices

ACHIEVEMENTS AND LEADERSHIP

- Qualified **GATE 2026** – Computer Science (AIR 4047) and Data Science & AI (AIR 4134)
- Awarded **Best Digital Wellness Innovation** at Nitiquest 2026; ranked Top 12 out of 1400+ teams
- **2nd Runner-Up** at KodeKurrent 2025 Hackathon (Organized by IEEE-RGIPT)
- **Winner** of HackAGeek 2024 Hackathon (Organized by GeeksforGeeks)
- **Top 5%** in DPBH (Dark Pattern Buster Hackathon) 2023 National Final
- Served as **Computer Programming Teaching Assistant** and **Differential Equations Tutor** at RGIPT
